				When used with one or more of the following additives, the total amount shall not be more than 2.0 %: Calcium Carboxymethyl- cellulose, Methyl Cellulose, and Sodium Carboxymethyl- cellulose.
	Sodium Polyacrylate	All foods	0.20 %	
Miscellaneous	Active Carbone	All foods	0.20 /0	
Absorbent		Air roous		
Brewing agent	Ammonia			
Fermentation regulator Filtration aid	Ammonium Dihydrogen			
Prosessing agent	Phosphate	-		
Qulity improver	Ammonium Sulfate			
	Asparaginase	All foods		
	Calcium Acetate	All foods		
	Calcium Carbonate* Calcium Citrate	Chewing gum* * Only applied to Calcium Carbonate	as Ca 10% * 1.0% The above limits do not apply to foods approved to	Only when indispensable for manufacturing or processing the food, or when used for nutritive purposes.
	Calcium Dihydrogen Phosphate		be labeled as ″special. dietary	Only when indispensable for manufacturing or processing
	Calcium Dihydrogen Pyrophosphate		use."	the food, or when used for nutritive purposes.
	Calcium Hydroxide]		
	Calcium Monohydrogen Phosphate			
Miscellaneous Absorbent Brewing agent Fermentation regulator	Calcium Silicate	capsules and tablets as foods for specified health uses and foods with nutrient function claims		Not permitted in human milk substitutes or weaning foods.
Filtration aid Prosessing agent Qulity improver (continued)		Other foods	2.0 % When used with Silicon Dioxide (fine), the total amount shall not be more than 2.0	
	Calcium Stearate	All foods		1
	Carbon Dioxide	1		
	Diammonium Hydrogen	1		
	Phosphate			
	Dipotassium Hydrogen]		
	Phosphate			
	Disodium Dihydrogen	1		
	Pyrophosphate	4		
	Disodium Hydrogen			
	Phosphate	1		
	Hydroxypropyl Cellulose			
	Hydroxypropyl	All foods		

Major Use Category	Additives	Target Foods	Maximum Limits	Limitation for Use
	Hydrochloric Acid	All foods		Shall be neutralized or removed before the preparation of the finished food.
	Ion Exchange Resins	All foods		Shall be removed before the preparation of the finished food.
	Isopropanol			Only for extracting
	See the section, "Flavoring agents".	Нор	20g/kg Hop extract	Hop extract is limited to the substance that is added to the wort during the manufacturing of beer and low malt beer (including sparkling liquor).
		Fish meat	0.25g/kg Fish protein concentrate	Fish protein concentrate is fish meat from which the moisture and fat are removed.
		Other foods	0.2g/kg Extracts of other foods	Extracts of other foods and products made of these extracts (except products made of hop extract and fish protein concentrate).
	Liquid Paraffin	Bread	as residue limit less than	Only for releasing dough in dividing by automatic dispenser or in baking.
	Magnesium Carbonate	All foods		
	Magnesium Chloride	-		
	Magnesium Monohydrogen	-		
	Phosphate			
	Magnesium Oxide			
	Magnesium Stearate	All foods		Only for capsules,tablets,etc.which are not usual food forms as well as tablet confectionery.
	Magnesium Silicate	All foods		Only as filtration aid for fats & oil . Shall be removed before the preparation of the finished food.
	Magnesium Sulfate	All foods		
Miscellaneous Absorbent Brewing agent	Natamycin	Natural Cheese (confined to the surface of hard and semi-hard cheeses)	less than 0.020 g/k	g
Fermentation regulator Filtration aid Prosessing agent Qulity improver (continued)	Nitrous Oxide	Whip creams (referring to products obtained by whipping foods composed mainly of milk fat or foods made mainly of milk fat substitutes).		
	Oxalic Acid	All foods		Shall be removed before the preparation of the finished food
	Phosphoric Acid	All foods		indi indi
	Polyvinylpolypyrrolidone			Only as filtration aid. Shall be removed before the preparation of the finished food.
	Potassium Dihydrogen	All foods		
	Phosphate			
	Potassium Hydroxide	All foods		Shall be neutralized or removed before the pre- paration of the finished food.
	Potassium Metaphosphate	All foods		
	Potassium Nitrate	Cheese	0.20 g∕L of raw mill	
	r otassium mitrate			
		SAKE	0.10 g/L of raw ma	sh
	Potassium Polyphosphate	All foods		
	Potassium Pyrophosphate			

Major Use Category	Additives	Target Foods	Maximum Limits	Limitation for Use
	Silicon Dioxide	All foods		Only as filtration aid. Shall be removed before the preparation of the finished food.
	Silicon Dioxide (fine)	All foods	2.0 % When used with foods except capsules and tablets as foods for specified health uses and foods with nutrient function claims Calcium Silicate, the total amount shall not be more	Not permitted in human milk substitutes or weaning foods.
	Sodium Acetate	All foods		
	Sodium Carbonate			
	Sodium Dihydrogen			
	Phosphate			
	Sodium Hydroxide	All foods		Shall be neutralized or removed before the
	Sodium Hydroxide			preparation of the finished
	Solution			food.
	Sodium Metaphosphate	All foods		
	Sodium Methoxide	All foods		Shall be decomposed before the preparation of the finisher product, then the methanol produced during the decomposition shall be removed.
	Sodium Polyphosphate	All foods		
	Sodium Pyrophosphate			
	Sodium Sulfate			
	Sulfulic Acid	All foods		Shall be neutralized or removed before the preparation of the finished
	Zinc Sulfate	Sparkling liquor	as Zn 0.0010g∕kg	
Miscellaneous Absorbent Brewing agent Fermentation regulator Filtration aid Prosessing agent Qulity improver	Tricalcium Phosphate	All foods	as Ca 1.0% The above limits do not apply to foods approved to be labeled as "special. dietary	Only when indispensable for manufacturing or processing the food, or when used for nutritive purposes.
(continued)	Trimagnesium Phosphate	All foods		
	Tripotassium Phosphate			
	Trisodium Phosphate			
	Water-insoluble minerals:			When two or more of the
	Acid Clay		as maximum residue limit	additives listed in this section are used together, the total o
	Bentonite			each residue amount shall no be more than 0.50 %.
	Diatomaceous Earth	All foods	0.50 %	
	Kaolin	Chewing gum (when talc is only	5.0 % *	Only in case where its use is indispensable for manufactur
	Perlite	used)*		or processing of food.
	Sand			
	Talc [*] Other Similar Substances
