Commodity	Portion of Commodity to Which the MRL Applies and Which Is Analysed
Barley and buckwheat	Whole commodity
Wheat and rye	Whole commodity after removal of husks
Rice (brown rice)	Whole commodity after removal of husks
Corn (maize)	Kernels after removal of cob and husks
Other cereal grains	Whole commodity
Peas, beans (dry)(including butter beans, cowbeans (red beans), lentil, lima beans, pegia,	Seeds without pods
sultani, sultapya and white beans), broad beans and soybeans (dry))	Seeds without pous
Peanuts	Whole kernel after removal of shell
Other legumes/pulses	Seeds without pods
Apricot, ume plum (Japanese apricot), cherry, Japanese plum (including prune) and nectarine	Whole commodity after removal of stems and stones
Peach	Whole commodity after removal of skins and stones
Orange (including navel orange), grapefruit, citrus natsudaidai (whole), lime and lemon	Whole commodity
Citrus natsudaidai (pulp) and unshu orange (pulp)	Whole commodity after removal of peels
Citrus natsudaidai , peels	Whole commodity after removal of stems
Other citrus fruits	Whole commodity
Pear, Japanese pear, quince and apple Loquat	Whole commodity after removal of stems Whole commodity after removal of stems, skins and stones
Avocado and mango	Whole commodity after removal of stones Whole commodity after removal of stones
Kiwifruit	Whole commodity after removal of skins
Guava	Whole commodity after removal of stems
Date	Whole commodity after removal of stems and stones
Pineapple	Whole commodity after revmoval of crown
Passion fruit and papaya	Whole commodity
Banana	Whole commodity after removal of stems
Strawberry, cranberry, huckleberry, blackberry and blueberry	Whole commodity after removal of caps and stems
Raspberry	Whole commodity
Other berries	Whole commodity after removal of caps and stems
Japanese persimmon	Whole commodity after removal of stems and stones
Watermelon, makuwauri melon and melons	Whole commodity after removal of inedible peels and stems
Grape	Whole commodity after removal of stems
Other fruits	Edible portions Whole commodity. Wash the roots or tubers in water to remove loose
Turnip (roots) and Japanese radish (roots, including radish)	soil.
Turnip (leaves), watercress, kale, Japanese radish (leaves, including radish), and brussels	Whole commodity after removal of decayed leaves
Cauliflower and broccoli	Whole commodity after removal of leaves
Cabbage and Chinese cabbage	Whole commodity after removal of outer decayed leaves and core. A test material is prepared by cutting a head into equal four portion and collecting four portions from different four heads.
Kyona and komatsuna (Japanese mustard spinach)	Whole commodity after removal of roots and decayed leaves
Horseradish	Whole commodity. Wash the roots or tubers in water to remove loose
	soil.
Qing-geng-cai and other cruciferous vegetables	Edible portions
Sweet potato, konjac, taro, potato, yam and other potatoes	Whole commodity. Wash the roots or tubers in water to remove loose soil.
Pumpkin (including squash), cucumber (including gherkin) and oriental pickling melon	Whale sommedity after removal of stoms
	TWINDLE COMMINGULY AFTER TEMPOVALOF STEMS
(vegetable)	Whole commodity after removal of stems
Other cucurbits	Edible portions
	Edible portions Whole commodity after removal of decayed leaves Whole commodity after removal of leaves. Wash the roots or tubers in
Other cucurbits Artichoke, endive and chicory	Edible portions Whole commodity after removal of decayed leaves Whole commodity after removal of leaves. Wash the roots or tubers in water to remove loose soil. A test portion is prepared by thinly sliced and
Other cucurbits Artichoke, endive and chicory Burdock and salsify	Edible portions Whole commodity after removal of decayed leaves Whole commodity after removal of leaves. Wash the roots or tubers in water to remove loose soil. A test portion is prepared by thinly sliced and grounded with a meat grinder. Whole commodity after removal of roots and decayed leaves
Other cucurbits Artichoke, endive and chicory Burdock and salsify Shungiku	Edible portions Whole commodity after removal of decayed leaves Whole commodity after removal of leaves. Wash the roots or tubers in water to remove loose soil. A test portion is prepared by thinly sliced and grounded with a meat grinder.
Other cucurbits Artichoke, endive and chicory Burdock and salsify Shungiku Lettuce (including cos lettuce and leaf lettuce)	Edible portions Whole commodity after removal of decayed leaves Whole commodity after removal of leaves. Wash the roots or tubers in water to remove loose soil. A test portion is prepared by thinly sliced and grounded with a meat grinder. Whole commodity after removal of roots and decayed leaves Whole commodity after removal of decayed outer leaves and core
Other cucurbits Artichoke, endive and chicory Burdock and salsify Shungiku Lettuce (including cos lettuce and leaf lettuce) Other composite vegetables	Edible portions Whole commodity after removal of decayed leaves Whole commodity after removal of leaves. Wash the roots or tubers in water to remove loose soil. A test portion is prepared by thinly sliced and grounded with a meat grinder. Whole commodity after removal of roots and decayed leaves Whole commodity after removal of decayed outer leaves and core Edible portions
Other cucurbits Artichoke, endive and chicory Burdock and salsify Shungiku Lettuce (including cos lettuce and leaf lettuce) Other composite vegetables Shiitake mushroom, button mushroom and other fungi and mushrooms	Edible portions Whole commodity after removal of decayed leaves Whole commodity after removal of leaves. Wash the roots or tubers in water to remove loose soil. A test portion is prepared by thinly sliced and grounded with a meat grinder. Whole commodity after removal of roots and decayed leaves Whole commodity after removal of decayed outer leaves and core Edible portions Edible portions Whole commodity after removal of roots and decayed leaves Whole commodity after removal of tops. Wash the roots or tubers in
Other cucurbits Artichoke, endive and chicory Burdock and salsify Shungiku Lettuce (including cos lettuce and leaf lettuce) Other composite vegetables Shiitake mushroom, button mushroom and other fungi and mushrooms Celery, parsley and mitsuba Carrot and parsnip	Edible portions Whole commodity after removal of decayed leaves Whole commodity after removal of leaves. Wash the roots or tubers in water to remove loose soil. A test portion is prepared by thinly sliced and grounded with a meat grinder. Whole commodity after removal of roots and decayed leaves Whole commodity after removal of decayed outer leaves and core Edible portions Edible portions Whole commodity after removal of roots and decayed leaves Whole commodity after removal of roots and decayed leaves Whole commodity after removal of tops. Wash the roots or tubers in water to remove loose soil.
Other cucurbits Artichoke, endive and chicory Burdock and salsify Shungiku Lettuce (including cos lettuce and leaf lettuce) Other composite vegetables Shiitake mushroom, button mushroom and other fungi and mushrooms Celery, parsley and mitsuba Carrot and parsnip Other umbelliferous vegetables	Edible portions Whole commodity after removal of decayed leaves Whole commodity after removal of leaves. Wash the roots or tubers in water to remove loose soil. A test portion is prepared by thinly sliced and grounded with a meat grinder. Whole commodity after removal of roots and decayed leaves Whole commodity after removal of decayed outer leaves and core Edible portions Edible portions Whole commodity after removal of roots and decayed leaves Whole commodity after removal of roots and decayed leaves Whole commodity after removal of tops. Wash the roots or tubers in water to remove loose soil. Edible portions
Other cucurbits Artichoke, endive and chicory Burdock and salsify Shungiku Lettuce (including cos lettuce and leaf lettuce) Other composite vegetables Shiitake mushroom, button mushroom and other fungi and mushrooms Celery, parsley and mitsuba Carrot and parsnip	Edible portions Whole commodity after removal of decayed leaves Whole commodity after removal of leaves. Wash the roots or tubers in water to remove loose soil. A test portion is prepared by thinly sliced and grounded with a meat grinder. Whole commodity after removal of roots and decayed leaves Whole commodity after removal of decayed outer leaves and core Edible portions Edible portions Whole commodity after removal of roots and decayed leaves Whole commodity after removal of roots and decayed leaves Whole commodity after removal of tops. Wash the roots or tubers in water to remove loose soil.
Other cucurbits Artichoke, endive and chicory Burdock and salsify Shungiku Lettuce (including cos lettuce and leaf lettuce) Other composite vegetables Shiitake mushroom, button mushroom and other fungi and mushrooms Celery, parsley and mitsuba Carrot and parsnip Other umbelliferous vegetables Tomato, eggplant and pimiento (sweet pepper)	Edible portions Whole commodity after removal of decayed leaves Whole commodity after removal of leaves. Wash the roots or tubers in water to remove loose soil. A test portion is prepared by thinly sliced and grounded with a meat grinder. Whole commodity after removal of roots and decayed leaves Whole commodity after removal of decayed outer leaves and core Edible portions Edible portions Whole commodity after removal of roots and decayed leaves Whole commodity after removal of roots and decayed leaves Whole commodity after removal of tops. Wash the roots or tubers in water to remove loose soil. Edible portions Whole commodity after removal of stems
Other cucurbits Artichoke, endive and chicory Burdock and salsify Shungiku Lettuce (including cos lettuce and leaf lettuce) Other composite vegetables Shiitake mushroom, button mushroom and other fungi and mushrooms Celery, parsley and mitsuba Carrot and parsnip Other umbelliferous vegetables Tomato, eggplant and pimiento (sweet pepper) Other solanceous vegetables	Edible portions Whole commodity after removal of decayed leaves Whole commodity after removal of leaves. Wash the roots or tubers in water to remove loose soil. A test portion is prepared by thinly sliced and grounded with a meat grinder. Whole commodity after removal of roots and decayed leaves Whole commodity after removal of decayed outer leaves and core Edible portions Edible portions Whole commodity after removal of roots and decayed leaves Whole commodity after removal of roots and decayed leaves Whole commodity after removal of tops. Wash the roots or tubers in water to remove loose soil. Edible portions Whole commodity after removal of stems Edible portions
Other cucurbits Artichoke, endive and chicory Burdock and salsify Shungiku Lettuce (including cos lettuce and leaf lettuce) Other composite vegetables Shiitake mushroom, button mushroom and other fungi and mushrooms Celery, parsley and mitsuba Carrot and parsnip Other umbelliferous vegetables Tomato, eggplant and pimiento (sweet pepper) Other solanceous vegetables Asparagus	Edible portions Whole commodity after removal of decayed leaves Whole commodity after removal of leaves. Wash the roots or tubers in water to remove loose soil. A test portion is prepared by thinly sliced and grounded with a meat grinder. Whole commodity after removal of roots and decayed leaves Whole commodity after removal of decayed outer leaves and core Edible portions Edible portions Whole commodity after removal of roots and decayed leaves Whole commodity after removal of roots and decayed leaves Whole commodity after removal of tops. Wash the roots or tubers in water to remove loose soil. Edible portions Whole commodity after removal of stems Edible portions Whole commodity after removal of stems Edible portions
Other cucurbits Artichoke, endive and chicory Burdock and salsify Shungiku Lettuce (including cos lettuce and leaf lettuce) Other composite vegetables Shiitake mushroom, button mushroom and other fungi and mushrooms Celery, parsley and mitsuba Carrot and parsnip Other umbelliferous vegetables Tomato, eggplant and pimiento (sweet pepper) Other solanceous vegetables Asparagus Onion, garlic, welsh (including leek) and multiplying onion	Edible portions Whole commodity after removal of decayed leaves Whole commodity after removal of leaves. Wash the roots or tubers in water to remove loose soil. A test portion is prepared by thinly sliced and grounded with a meat grinder. Whole commodity after removal of roots and decayed leaves Whole commodity after removal of decayed outer leaves and core Edible portions Edible portions Whole commodity after removal of roots and decayed leaves Whole commodity after removal of tops. Wash the roots or tubers in water to remove loose soil. Edible portions Whole commodity after removal of stems Edible portions Whole commodity after removal of stems Edible portions Whole commodity after removal of stems Edible commodity after removal of roots and easily detachable skin
Other cucurbits Artichoke, endive and chicory Burdock and salsify Shungiku Lettuce (including cos lettuce and leaf lettuce) Other composite vegetables Shiitake mushroom, button mushroom and other fungi and mushrooms Celery, parsley and mitsuba Carrot and parsnip Other umbelliferous vegetables Tomato, eggplant and pimiento (sweet pepper) Other solanceous vegetables Asparagus Onion, garlic, welsh (including leek) and multiplying onion Nira (Chinese chives) and other liliaceous vegetables	Edible portions Whole commodity after removal of decayed leaves Whole commodity after removal of leaves. Wash the roots or tubers in water to remove loose soil. A test portion is prepared by thinly sliced and grounded with a meat grinder. Whole commodity after removal of roots and decayed leaves Whole commodity after removal of decayed outer leaves and core Edible portions Edible portions Whole commodity after removal of roots and decayed leaves Whole commodity after removal of tops. Wash the roots or tubers in water to remove loose soil. Edible portions Whole commodity after removal of stems Edible portions Whole commodity after removal of stems Edible portions Whole commodity after removal of stems Edible portions Whole commodity after removal of roots and easily detachable skin Edible portions
Other cucurbits Artichoke, endive and chicory Burdock and salsify Shungiku Lettuce (including cos lettuce and leaf lettuce) Other composite vegetables Shiitake mushroom, button mushroom and other fungi and mushrooms Celery, parsley and mitsuba Carrot and parsnip Other umbelliferous vegetables Tomato, eggplant and pimiento (sweet pepper) Other solanceous vegetables Asparagus Onion, garlic, welsh (including leek) and multiplying onion Nira (Chinese chives) and other liliaceous vegetables Green soybeans, kidney beans (immature, with pods)	Edible portions Whole commodity after removal of leaves. Wash the roots or tubers in water to remove loose soil. A test portion is prepared by thinly sliced and grounded with a meat grinder. Whole commodity after removal of roots and decayed leaves Whole commodity after removal of decayed outer leaves and core Edible portions Edible portions Whole commodity after removal of roots and decayed leaves Whole commodity after removal of roots and decayed leaves Whole commodity after removal of tops. Wash the roots or tubers in water to remove loose soil. Edible portions Whole commodity after removal of stems Edible portions Whole commodity after removal of stems Edible portions Whole commodity after removal of roots and easily detachable skin Edible portions Whole commodity after removal of pedicels Whole commodity after removal of stems. Whole commodity after removal of stems.
Other cucurbits Artichoke, endive and chicory Burdock and salsify Shungiku Lettuce (including cos lettuce and leaf lettuce) Other composite vegetables Shiitake mushroom, button mushroom and other fungi and mushrooms Celery, parsley and mitsuba Carrot and parsnip Other umbelliferous vegetables Tomato, eggplant and pimiento (sweet pepper) Other solanceous vegetables Asparagus Onion, garlic, welsh (including leek) and multiplying onion Nira (Chinese chives) and other liliaceous vegetables Green soybeans, kidney beans (immature, with pods) and peas (immature, with pods) Okra	Edible portions Whole commodity after removal of leaves. Wash the roots or tubers in water to remove loose soil. A test portion is prepared by thinly sliced and grounded with a meat grinder. Whole commodity after removal of roots and decayed leaves Whole commodity after removal of decayed outer leaves and core Edible portions Edible portions Whole commodity after removal of roots and decayed leaves Whole commodity after removal of roots and decayed leaves Whole commodity after removal of tops. Wash the roots or tubers in water to remove loose soil. Edible portions Whole commodity after removal of stems Edible portions Whole commodity after removal of roots and easily detachable skin Edible portions Whole commodity after removal of pedicels Whole commodity after removal of stems.
Other cucurbits Artichoke, endive and chicory Burdock and salsify Shungiku Lettuce (including cos lettuce and leaf lettuce) Other composite vegetables Shiitake mushroom, button mushroom and other fungi and mushrooms Celery, parsley and mitsuba Carrot and parsnip Other umbelliferous vegetables Tomato, eggplant and pimiento (sweet pepper) Other solanceous vegetables Asparagus Onion, garlic, welsh (including leek) and multiplying onion Nira (Chinese chives) and other liliaceous vegetables Green soybeans, kidney beans (immature, with pods) and peas (immature, with pods) Okra Sugarcane	Edible portions Whole commodity after removal of decayed leaves Whole commodity after removal of leaves. Wash the roots or tubers in water to remove loose soil. A test portion is prepared by thinly sliced and grounded with a meat grinder. Whole commodity after removal of roots and decayed leaves Whole commodity after removal of decayed outer leaves and core Edible portions Edible portions Whole commodity after removal of roots and decayed leaves Whole commodity after removal of tops. Wash the roots or tubers in water to remove loose soil. Edible portions Whole commodity after removal of stems Edible portions Whole commodity after removal of stems Edible portions Whole commodity after removal of roots and easily detachable skin Edible portions Whole commodity after removal of pedicels Whole commodity after removal of stems.

Compositional Standards for Food in General 5(2), 6(2) and 7(2)

Commodity		Portion of Commodity to Which the MRL Applies and Which Is Analysed
Spinach		Whole commodity with red roots after removal of root (except red roots) and decayed leaves
Bamboo shoots and other vegetables		Edible portions
Sesame seeds, rapeseeds, sunflower seeds, safflower seeds, cotton seeds and other oil seeds		Whole commodity
Almond, ginkgo nut, chestnut, walnut, pecan and other nuts		Whole commodity after removal of shell
	in case of 5(2)	Whole commodity after removal of shell
Cacao beans	in case of 6(2)	Whole commodity: Glyphosate, Chlorothalonil, Dichlorvos and Naled, Bioresmethrin, Pyrethrins whole commodity after removal of shell: except of Glyphosate, Chlorothalonil, Dichlorvos and Naled, Bioresmethrin, Pyrethrins
	in case of 7(2)	Whole commodity
Coffee beans		Whole commodity
Tea		Dried leaves
Нор		Dried cones
Other spices and other herbs		Edible portions
